

# TIPS FOR NURTURING NATION LOVE

## Eat at International Restaurants

We love Cracker Barrel and Chick-fil-A too, but eating at a local Indian, Thai, or other ethnic restaurant can give you a taste of international culture and people—even if you have to do takeout!

---

## Watch, Read, and Learn

When you see videos or read stories about news in other countries, Google the country or look it up on the Joshua Project website to find out how you can pray specifically for current events and the people there.

---

## Google Earth

Google Earth is a free online globe that you can lose track of time exploring. Grab the family and go on a virtual international adventure together to a place (or several places!) you've never been before.

---

## Visit Places of Worship

Mask up and stop in to another faith's place of worship in your town (Hindu Temple, Muslim Mosque, etc.) and see if you can connect with the religious leader there to build a relationship. You never know how God might bless that connection!

---

## Check out Live Global

Live Global highlights how God is working through national believers all across the globe. Praise the Lord with us for how he is moving and join us in praying for global requests.
